

StarFybr™ Molded Starch

100% Plant-based. 100% Compostable. 100% Cost-competitive.

Evanescence is the new name in sustainable packaging technology. Guided by the circular economy, we reinvent packaging to reform our place in nature.

Set on becoming industry disruptors with cost-competitive, plant-based serviceware alternatives that decompose in 90 days or less, Evanescence products reduce the impact of plastic and EPS (Expanded Polystyrene) foam materials, that take 500 years or more to decompose.

The change begins with you.

 **EVANESCE®**

Choose a new future

-  Showcase your sustainable commitment using renewable materials
-  Improve your environmental footprint
-  Divert waste from landfills
-  Being sustainable is affordable

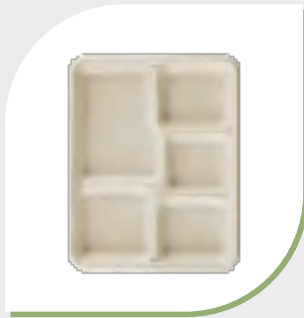

Replace EPS foam serviceware with our affordable and truly sustainable Molded Starch.

StarFybr™ Molded Starch

Say goodbye to EPS foam trays, bowls, takeout containers, and serviceware items. Choose our 100% compostable plant-based packaging technology that costs less than other eco-friendly single-use serviceware alternatives and decomposes in 90 days or less.

Trays
Standard Food Industry Sizes

Divided meal trays
Standard Food Industry Sizes

Bowls
8 / 12 / 16 oz

Hot or cold cups
12 / 16 / 20 / 24 / 32 oz
